

ACH Engineering Inc.

Cleanroom Coving

ACH Engineering is a trusted name in manufacturing, trading and supplying Clean Room Covings. Our covings are designed & developed in compliance with the industry standards. Covings are manufactured using quality food grade material. Our products are stringently checked for optimum quality and are offered to clients at the best rates.

Our covings are used to create fully flushed corner transitions and seamless wall-to-ceiling and wall-to-floor connections. Monolithic wall and ceiling joints are bonded together, and three-way welded corner assemblies are available for inside ceiling corner and wall intersections.

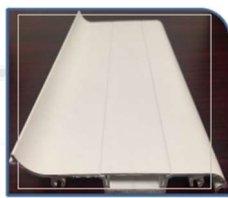

Our PVC & aluminum covings are designed & developed in compliance with the industry standards. Covings are manufactured using quality food grade materials
